

OUTDOOR SOLUTIONS

« Everyone loves wood »

by Jean François Schmit, architect, Paris.

Why did you choose Wooding for your project ?

I knew the manufacturing quality would be perfect, it is very easy to install and highly resistant to environmental attack.

What are its main advantages ?

The professionalism and simplicity of its tailor-made solutions, which are prepared in the workshop and are delivered ready to use. This makes our job easier and we save time and therefore money on the worksite. Also, its excellent durability over time. And of course, Wooding guarantees quality and safety in the long term.

What about appearance ?

The wide variety of solutions give the project a real added extra in "seduction" value.

What is the advantage for the final user?

Everyone loves wood! For its beauty, its warmth, its natural appearance...

Trust the specialists

Allin felled its first poplar trees in 1919, and began producing plywood panels before turning to industrial production. In 2000, the company took over the Dutch company Bruynzeel Multipanel, enabling us to provide high-level technical solutions and know-how of international reputation for outdoor cladding, acoustic and marine applications. In 2004, it united the two ranges (ALLIN and BRUYNZEEL) under the name of WOODING.

Responsible Business

The entire ALLIN quality control chain is certified according to FSC, PEFC and OLB standards.

Our labels guarantee the use of wood and plywood which meets the NF CTB-X Exterior Plywood standards (Afnor certification performed by the FCBA, the French Institute of Technology for forest-based and furniture sectors) and KOMO (Dutch certification from the Stichting Bouwkwiteit)

The panels also hold the Lloyd's Register of London certificate.

INVENT, CREATE, INNOVATE...

Wooding offers customised cladding solutions and creates ready-to-install, tailor-made panels according to your drawings and parts lists, in high-quality materials with a perfect finished appearance.

Count on a professional

Wooding guarantees :

- identification of its panels to **facilitate installation**
- packing designed for **optimum protection**
- compliance with the DTU code of practice 41.2 to **meet the technical requirements of your construction**
- machining of the horizontal edges at 15° to **help water run off easily.**
- a radius of 3mm on visible angles to **optimise the application and adhesion of the finish**
- **sanding of the 4 edges for improved protection**
- **a choice of 5 shades** for your transparent finishes
- **an infinite number of colours** for your opaque finishes
- the use of timber recommended by the FCBA (French Institute of Technology for forest-based and furniture sectors), selected **for their resistance and durability.**

Think long-term

To preserve the appearance of its **panels with transparent finishes** for as long as possible, Wooding has selected water-based technologies. They have all the qualities of solvent-based products: resistant to yellowing and high resistance to natural UV rays and humidity.

For its **"Multipaint" opaque finish panels**, Wooding recommends the use of polyurethane acrylic paint: ultra-resistant over time offering a huge variety of colours.

CREATE A NATURAL LOOK

Our carefully selected timber species enable you to create the natural look you want:

Okoume for its perfect machining qualities

Growing over an area of 20 million hectares in Gabon, Okoume is a real force of nature and can reach heights of 40m. It offers exceptional mechanical qualities for plywood.

Sapelli for its aesthetic value

Found in Cameroon, Sapele has very fine grain, an even colour, excellent qualities for gluing and perfect compatibility with finishing products.

WHAT ABOUT YOUR PROJECT ?

YOUR PROJECT : 10-year guarantee: 20-year guarantee:

Outdoor cladding with transparent finish	WOODNATURE* WOODPREMIUM*	WOODPREMIUM PLUS*
Bare outdoor cladding, without finish	REGINA MAHONIE	HECHTHOUT SUPRAHECHT
Outdoor decoration : Grooved panels	MULTIGROOVE	
Filmed ready-to-paint panels	MULTIPAINT	

HECHTHOUT – Delivered untreated**

Beauty which can stand up to time and weather!

Extremely robust and perfectly suited to outdoor use, this bare plywood panel combines durability and an attractive appearance - what more could architects and decorators want?

REGINA MAHONIE – Delivered untreated**

Robust and refined

Exceptional resistance and an expensive look are the features of this panel which is perfectly suited to outdoor conditions.

WOODING
by
Allin Bruynzeel

SUPRAHECHT – Delivered untreated**

Long-term resistance in all weathers !

This « 100% sapele » panel is guaranteed for 20 years, ensuring impeccable beauty and exceptional resistance to the elements.

WOODNATURE – Transparent finish

Simply attractive

Woodbardage solutions are easy to install, with uniquely high quality production and appearance. These tailor-made and extremely natural panels exist in a wide variety of shades and forms which ideally blend with modern architectural work.

WOODPREMIUM – Transparent finish

Ultra-natural appearance

For those who love the look of sapelli, this panel exists in an infinite number of shades and easily adapts to even the most modern creations.

WOODPREMIUM PLUS – Transparent finish

Beauty guaranteed for 20 years !

These extremely practical contemporary solutions are beautifully aesthetic and will stand the test of time with ease !

MULTIPAINT – Opaque finish

Wide choice of colours

This high-quality plywood panel has a 15-year guarantee and is covered on both sides with a layer of synthetic resin applied under pressure at high temperature, fusing the whole together.

Multipaint offers a very wide range of finishes. The application of a polyurethane acrylic paint gives a finish which is ultra-resistant over time.

MULTIGROOVE

The charm of clapboard

This grooved panel for outdoor decoration (shutters, garage doors, wall covering, etc.) is available in several colours and designs: straight or 45° grooves to achieve the typical "clapboard" effect of American houses.

WOODPRIME

Minimum preparation

This pre-painted panel requires little preparation - one or two coats are enough - allowing you to get straight down to business for a top-quality finish using the usual products (oil-based, vinyl and acrylic paints).

*Guarantee applies on glue of plywood ONLY

**All panels must receive a finish in accordance with the environment where they are used
